

Mohammad M. Maasfeh

Qatari Resident | mm2308642@qu.edu.qa | +974 33919241 | <https://mohammad-maasfeh.github.io/Portfolio-Project/>

EDUCATION

Qatar University

Doha, Qatar

B.S. in Computer Engineering

Expected Graduation, May 2027

- **GPA:** 3.71/4.00, *Dean's and Vice President List*
- **Related Coursework:** Object-Oriented Programming, Programming Concepts, Discrete Structures for Computing, Fundamentals of Electric Circuits, Data Structures, Digital Logic Design, Computer Architecture & Organization, Probability & Statistics for Engineers, Engineering Economics, Electronics Devices, Signals & Systems, Data Communication and Networks, AI Fundamentals, Micro Processor Based Design, Machine Learning, Digital Signal Processing, Computer Engineering Practicum

EXPERIENCE

Qatar University

Doha, Qatar

AI Research Assistant

May 2025 - Present

- **Second author** of a peer-reviewed paper **awarded Best Paper at ECIR** (European Conference on Information Retrieval), a top-tier international IR conference.
- Secured \$30,000+ in competitive research funding to support compute, experimentation, and dissemination.
- Designed a large-scale evaluation framework to measure political stance and cross-prompt consistency in Large Language Models, evaluating **9 state-of-the-art LLMs across 24 geopolitical issues**.
- Developed and analyzed **five prompting strategies** and identified systematic patterns in **model bias, persistence, and language-dependent stance shifts over 3,000+ model responses**.
- Currently finalizing another paper focused on AI powered legal summarization.

VORA

Doha, Qatar

Co-founder & Systems Engineer

December 2025 – Present

- Co-founded an AI-powered AC retrofit (device + app) cutting GCC cooling bills by **30%** - led system architecture, embedded design, and full-stack integration.
- Closed **150+ B2C waitlist signups (vora.qa)** and validated demand through 16 customer interviews.
- Incubated at Qatar Science & Technology Park (QSTP), Qatar Foundation.
- **Nationals Winner - Huawei ICT Innovation Competition 2026**
- **1st Place** - Qatar Innovation Program 2025 and **2nd Place** - **AI Fikra National Entrepreneurship Competition**
- **35,000 QAR in awards** from Qatar's MECC and AI Fikra

Success Oasis at Qatar University

Doha, Qatar

Tutor

October 2023 - Present

- Provided one-on-one tutoring to numerous students at Success Oasis Tutor, Qatar University's College of Engineering, fostering academic excellence and personalized learning.
- Worked as a TA in computer Engineering / science labs.

AZER

Doha, Qatar

Instructor & Engineering Tutor

December 2025 - Present

- Completed a specialized technical course and transitioned into an instructional role.
- Currently tutoring engineering and computer science students.
- Developing and planning additional advanced technical courses.

PROJECTS

AI Powered Cancer Diagnosis

Doha, Qatar

Team Lead

Feb 2026 – May 2026

- Built an end-to-end machine learning pipeline on 91 patient samples **43,806 RNA-seq genes** classifying kidney chromophobe tumors vs. healthy tissue.
- Trained and benchmarked three models (**Logistic Regression, Random Forest, Neural Network**) and achieved 5-fold cross-validation **F1 of 0.98-1.00**.
- Identified a **5-gene biomarker panel** sufficient for ceiling accuracy via feature-count sweep and Recursive Feature Elimination - supporting low-cost clinical screening.

CPU Design using Logisim

Doha, Qatar

Team Lead

March 2025 – June 2025

- Designed and built a fully functional **8-bit CPU design**, featuring an ALU, **4 general-purpose registers**, 256×16 ROM, 256×8 RAM, and a custom control unit.
- Developed a custom **9-instruction ISA** with **16-bit fixed instruction format** spanning data transfer (LDR/STR), arithmetic (ADD/SUB), logic (LSL/LSR), and conditional branching (CMP/JMP).
- Resolved critical timing conflicts between instruction fetch, memory access, and register updates by implementing **edge-triggered synchronization** (rising/falling edge logic) to maintain single-cycle execution.

Contract Lifecycle Management

Doha, Qatar

Team member

October 2025 -November 2025

- Built **Naja7**, an end-to-end **AI-powered legal contract analysis platform** that ingests different document types and produces structured legal insights, extracting parties, flagging missing clauses, identifying risks, and giving jurisdiction-aware recommendations.
- Deployed via a real-time **Streamlit interface** with multi-page document support and jurisdiction-specific analysis.
- Architected a **multi-cloud AI pipeline** integrating **Azure Translator** (bidirectional Arabic - English with auto language detection), an industry-bert-contracts **domain-specific** legal model, and **OpenAI GPT-4o-mini** for conversational follow-up Q&A.
- Implemented **production-grade resilience** through handling Hugging Face model cold-starts, API auth failures, and network timeouts.

ACTIVITIES AND LEADERSHIP

Qatar University

Doha, Qatar

December 2023

NTA and Career Excellence Workshop

- Successfully completed the NTA (National Tutoring Association) program
- Successfully completed several Workshops at Qatar University such as Career Development Center Workshop.

Qatar University

Doha, Qatar

November 2023

Volunteer and part time Job

- Volunteered in various university events, including the Dean's List event, focused on academic recognition and student engagement initiatives.
- Assisted in organizing the **Qatar University Career Fair** event. As well as volunteering during **Sports Day** with PerfectTouch, contributing to planning and logistics.
-

SKILLS

- **Programming:** Java, Python, HTML/CSS
- **Tools:** Numpy, Pandas, Packet Tracer, VsCode, Multisim for circuit design, GitHub, Eclipse, Logisim
